EDUCATION

University of Toronto

Bachelor of Science in Computer Science and Technology, Coding & Society

Toronto, Ontario Canada

Sep. 2022 – Present

EXPERIENCE

AI Developer/Computer Science Intern

Coaching and Sales Institute

Apr. 2026 – Aug. 2026

Remote, Ontario

- Developed **voice AI agents** that enable clients to conduct simulated, verbal sales pitch training.
- Managed **AWS** deployment and maintenance for two flagship projects.
- **Tailored AI model parameters** and conversational flows to meet client specifications and operational needs.

AI Engineer

Global Health Core Inc.

Jan. 2025 – Apr. 2025

Toronto, Ontario

- Built a **KDTree** to find the closest medical facility in **$O(\log n)$** time, reducing search times by **6,700%**.
- Engineered a **Django REST API** to query a **NoSQL database**, dynamically returning the top three Canadian health clinics based on geographic proximity, treatment capabilities, and wait times.
- Performed **end-to-end tests** and **unit tests** to assure proper functionality, on desktop and mobile.

MCSS (Math & Computational Sciences Society)

Events Director & Senior Advisor

Sep. 2023 – Present

University of Toronto

- Organized workshops, events, and Deerhacks (A **UofT** hackathon with **300+ students** attending).
- Ran workshops covering **Web Design**, **React**, **Deployment**, **GitHub** and more.
- Managed a team of 9, holding **weekly meetings** and one-on-ones as needed.

PROJECTS

Vamsi (1st place EmberHacks 2025) | JavaScript, Gemini, ElevenLabs

- Created a VS Code extension which uses an **LLM** to give students prompts on how to solve coding problems.
- Used **ElevenLabs'** text2speech to read Gemini's advice.
- Created a **webservice** which collects issues detected by Gemini and summarizes them for a professor.

Stock Charity | Django, REST API, React, Jest, TypeScript, SQL, Node.js

- Created a **mobile responsive interactive front-end** using **React**, **TypeScript** and **Tailwind** that called custom **REST APIs** to display user information.
- Created **unit tests** and conducted **end-to-end testing** to assure all code worked as intended.
- Created a **dynamic database** using **SQLite** to hold **user data**.

Global City Data Pipeline | TypeScript, Python, FastAPI, Docker

- Worked with a team of 7 to create a **map visualizer** of **urban data** for city planners to have a central location to collect city information for analysis.
- Created a population density **basemap** using CIESIN and Meta's population density **API**.
- Setup **Docker** and a **CI Pipeline** to streamline **AWS** deployment.

Java Adventure | Java, Agile, CSS

- Led **Agile** software development as the **project manager** and held **weekly meetings**.
- Made use of **JavaFX** to create a vibrant and fully interactive user experience.
- Used **OOP** to create responsive backend and **controller logic** in Java.

Custom Shell | C, Command Line, Makefiles, Linux

- Created a Custom Shell in **C** that performs commands, **redirects input/output** and assigns variables.
- Used **Makefiles** to **conditionally compile** the program to **optimize compilation**.
- Developed a custom **tokenizer** to parse user input and execute the corresponding C functions efficiently.

TECHNICAL SKILLS

Languages: Python, Django, TypeScript, JavaScript, HTML/CSS, Java, C/C++, SQL, RISC-V, Kotlin

Libraries: PyTest, NumPy, Matplotlib, Jest, Tailwind, JavaFX

Developer Tools: GitHub Actions, Jira, Rest API, React, Gemini, LaTeX, Figma, Git, Linux, Unix
